EDUCATION

New York University Abu Dhabi

Bachelor of Science in Computer Science, Applied Mathematics and Economics

Graduation: May 2027

Abu Dhabi, UAE

- Full Ride Scholarship

Relevant Coursework: Data Bootcamp, Intro to Deep learning and LLMs, Agile Software Development, Data Structure and Algorithms, Introduction to Databases, Intro to CS, Quantitative Methods (Linear Algebra, Probability & Statistics)

SKILLS

Python, C++, JavaScript/TypeScript (React, Node.js, Express, Tailwind), NumPy, Pandas, Matplotlib, SQL/MongoDB, PyTorch, Keras, PennyLane, Qiskit, LangChain, LangGraph, Git, Excel, Case Analysis, Data Visualization, Machine Learning, and Web Development

WORK EXPERIENCE

Baraka (YC S21)

Product & AI Intern

January 2026 - Present

Dubai, UAE

- Designed end-to-end workflows and high-level user journeys to automate the processing of delisted securities, improving operational efficiency
- Leading automation of the delisted securities handling process, reducing manual intervention and turnaround time.
- Collaborating with product and engineering teams to translate business requirements into scalable automation solutions.

Swftbox

AI Intern

June 2025 - August 2025

Abu Dhabi, UAE

- Built a full-stack AI chatbot with Google Gemini AI and sentiment-based feedback using LangChain and LangGraph.
- Designed a React + Chart.js + MongoDB dashboard for real-time analytics and KPI tracking.
- Integrated Python with a Node.js backend and Google Generative AI API for dynamic conversation management.

Division of Science @ NYU Abu Dhabi

Quantum Machine Learning Research Assistant

July 2024 - February 2025

Abu Dhabi, UAE

- Researched robustness of quantum machine learning models against adversarial attacks on image datasets.
- Trained quantum convolutional and quantum neural networks to evaluate accuracy and resilience.
- Developed defense strategies and analyzed performance to improve model robustness.

Pet Republic

Software Development Intern

August 2024 - December, 2024

Abu Dhabi, UAE

- Revamped the company website using React, HTML, and CSS to enhance design and user experience.
- Collaborated with veterinary clinics to gather requirements and tailor platform features.
- Conducted usability testing and implemented feedback to improve navigation and functionality.

PROJECTS

Richie Rich : Hack Princeton Project

- Developed a real-time receipt management and financial analysis app using Next.js, TypeScript, Tailwind, Python, and xAI Grok Vision OCR to transform spending data into actionable insights.
- Integrated multiple APIs (Dedalus, financial comparison services, Gemini-X) to categorize expenses, identify savings opportunities, and visualize compound growth potential.
- Built a fully automated pipeline with data cleaning, analytics, and an intuitive dashboard to help users make smarter financial decisions without prior expertise.

BubbledIn: Hack Harvard Project

- Built a real-time web app enabling private, low-latency audio “bubbles” using WebRTC, React/TypeScript, Tailwind, Firebase, and QR-based room joining for seamless communication in chaotic environments.
- Implemented live transcription (Web Speech API) and conversation summarization (Gemini API) to enhance accessibility and team collaboration.
- Engineered an intuitive, zero-friction user experience by integrating automatic mic permissions, streamlined connection flows, and lightweight UI components, ensuring users can join and communicate instantly without downloads or logins.
